

Design an Agent for Your Workflow

Session 1 • Theory Assignment

Instructions:

- Watch Videos 1 & 2 (Cohort Introduction and What is an AI Agent)
- Answer the question below in 2-3 pages
- Submit as PDF or Word by the deadline

Assignment:

Design an agent solution for a real workflow in your organization.

Pick a task that takes 4+ hours per week (recurring, research-heavy, or repetitive). Describe: (1) What's the problem? (2) How would an agent solve it step-by-step? (3) Where does human judgment stay essential? (4) How would you measure success? (5) When would you trust it to run without your review?

Reference examples from the videos: Harim's curriculum mapping, Haroon's invoice tracking, Usman's research cycles.

Submit your response by the deadline.
